PRELIMINARY REPORT, NORTH KOREA, NO 1   SAH

Preliminary analysis of aerial photography from☐Mission 128 flown   **25X1**
6 December 1962 reveals the following items of special interest in North Korea:

1. MAYANG-DO NAVAL FACILITY

Two submarines, probable "W" class, three patrol craft, one probable floating
shearlegs, and one unidentified small craft, are docked at a naval facility on
Mayang-do, an island, about 2.5 nautical miles southeast of Sinp'o. The facility
consists of a 450-foot pier, a small barracks area, a probable administration
building and about 15 scattered storage or support buildings.

2. UIJU AIRFIELD

Sixty BEAGLE and one single-engine aircraft are observed on Uiju Airfield,
three nautical miles south-southwest of Uiju. The airfield has an approximate 8,100
x 180 foot, NE/SW, probable concrete runway which is serviceable and approximately
46 aircraft or storage revetments. A support area .7 nautical miles south of the
runway contains about 90 buildings of various sizes possibly used for billets,
storage or other support purposes. No defenses or electronics equipment are observed.

3. KOKSAN MILITARY ACTIVITY

Forty-five military barracks, associated trench systems and a revetted ammuni-
tion storage site are in an area 2.8 nautical miles southwest of Koksan. Other
installations include one small barracks area 4.6 nautical miles southwest of
Koksan, an ammunition storage area on a hilltop 6.3 nautical miles southwest of
Koksan and several other small barracks areas.

STATUS OF MISSION READOUT

PI readout of Mission GRC 128 is approximately 20 percent complete. An
Immediate Photographic Interpretation Report (IPIR) will be published upon
completion of the readout.
